

It's time for a change

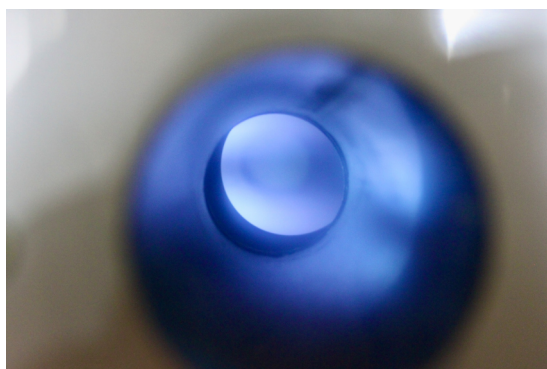

Due to the current political situation with unstable future of Gas and Oil supply a change to electrical heated ovens needs to be considered to secure safe operation of your production lines.

Further it is the best way to reduce your CO₂ foot print!

Dual power strategy!

Use electric and gas heating side by side.

Let us analyse your current situation and propose the possibilities you have.

Want to save Energy costs?

Beside the change from Gas to Electric we also will look into energy saving possibilities for your old ovens.

Efficiency rating of current ovens

With over 20 years of experience in equipment design and manufacturing, MG.SERVE.TEC can provide an efficiency rating of your current system.

As a result we will suggest improvements to lower your energy costs.

Your benefits

- ▷ Secure the future and be flexible
- ▷ Keep energy costs low
- ▷ Reduce your energy costs
- ▷ Reduce your CO₂ foot print
- ▷ Invest in your future
